

# Alternative Treatment Services towards the Recovery of the People of Indonesia.

- **Author(s):** Rasidin Calundu
- **Abstract:** This type of qualitative research approach through Phenomenology, the results showed that treatment. The traditional is a form of therapy that uses the means, tool, or material not included in the standard treatment of modern medicine and is used as an alternative or complementary treatment of modern medicine. Physician/traditional Herb using media treatment that uses plants with natural materials as raw material and that element of prayer viewpoints will be a disease is absolute which must be delivered by physicians (spiritual). Trend increased use of traditional medicine is realized for a few reasons: synthetic drugs factory prices are higher. The side effects caused by conventional medicine are minimal, and the content contained in traditional medicine became the basis of modern medical treatment.
- **Keywords:** Phenomenology, Physician/traditional Herb, raw material, traditional medicine, synthetic drugs
