- **Abstract:** This paper includes all features and procedures which are required to develop the online examination system. Online Examination System is very useful for Educational Institutes to prepare an entire examination with less time and less cost. It will help the educational Institute to test students and development their skills. But the disadvantage of Online Examination System is that it takes a more time when institute prepares the examination at the first time for usage. And to take the examination we require the number of computers with the same number of students. The effective use of Online Examination System is to develop the tests as their requirements and for getting better results in less time.
- **Keywords:** Online Examination System, institute, development
