

Crowdfunding for healthcare during pandemic.

- **Author(s):** J. Vignesh Rajkumar ,Dr. S. Bhama
- **Abstract:** With a rapid growth in technology, crowdfunding has become increasingly popular in the last few years. Of course, crowdfunding has established its popularity as a remedial practice of the governments against the fight on pandemics. Especially, medical based crowdfunding helps to raise funds online for healthcare expenses of the needy. The objective of this paper is to create a donation-based crowdfunding platform. This is developed using HTML, CSS, JavaScript and PHP. An organizer can raise fund on behalf of the beneficiary, by entering the necessary details of the concerned beneficiary Once the details are validated, the request is forwarded for being published in the web page. Donor details will also be listed in the webpage and they can donate to any beneficiary they wish.
- **Keywords:** healthcare expenses, webpage, crowdfunding
