- **Abstract:** Library accreditation is an activity in order to evaluate all activities of library management measured based on certain quality standard parameters. Standard is a reference measure of quality. Library accreditation also applies to specialized libraries. There are six aspects that are in the spotlight and must be considered in order to achieve the goals and targets of achieving library quality. Starting from library collections, library facilities and infrastructure, library services, library staff, library administration and management as well as reinforcement.
- **Keywords:** Library accreditation, library management
