- **Author(s):** Martoyo ,Elyta
- **Abstract:** This paper discusses about policy/program of Business Increase Income Prosperous Family Indonesia, abbreviated Business Increase Income Prosperous Family Indonesia interpreted to increase prosperity and family harmony. This study analyzes Indonesia's Business Increase Income Prosperous Family Indonesian Group programs towards good governance-based policies. The survey results indicate the existential value of the business situation of the Business Increase Income Prosperous Family Indonesia community in South Pontianak District today does not guarantee. This is seen from the majority (65%) of businesses that are no longer in operation. The contribution of Business Increase Income Prosperous Family Indonesia community activities to family income are relatively minimal. This can be seen from the average donation of Business Increase Income Prosperous Family Indonesia resulted in a family income of 13.2% , with the lowest contribution of 5,9% and the highest of 24,3%. Linkages with other economic sectors in the existing village office, such as in the production process, are also relatively low, considering its output is mainly in the local area (around the village office). The author offers suggestions, including monitoring and evaluation, which should be done periodically to solve the problem at hand. Capital assistance for each member of the business group can also be in the form of equipment needed. Conducted training/business guidance regularly in using appropriate technology and marketing the product through a foster father system.
